Education

Jonai Science College

2018 - 2020 // Jonai, Assam, India
Class XII

Projects

CRUD-operation(with fake server)	A prototype of CRUD operation with fake json server. It is done with two ways - the first one is using fetch method in vanilla JS. And the other with the axios in reactJS. We can create post, update it and delete it along with getting all the posts.
Filter/Searching data in UI	A simple dashboard showing list of users. We can filter the status along with getting the search items from the search bar.
Weather-app	It access your location and give the weather information in the UI. User can also search for another city as input and display the results, through API calls.
Login User Interface	A simple black and white theme login page with ReactJS.

Skills

Primary

Javascript(ReactJS)

Others

Version Control System(Git, Github), Figma

Soft

Fast-learner, Analytical-skill, Problem-solving, Adaptibility, Self-awareness, Time-management.
